

Orlando Lopez

Salt Lake City, UT | lopezorlando23@gmail.com | 801-663-4515 | [LinkedIn](#)

Professional Summary

Software Engineer with 4+ years of experience building scalable applications using C# and the .NET ecosystem. Proven track record of modernizing legacy systems into microservices, improving performance, and supporting production environments. Experienced with SQL Server, RabbitMQ, Docker, and Agile development practices.

Professional Experience

Software Engineer II – Waystar

Sep 2021 – Present

- Delivered scalable application features using **C# and .NET**, improving performance and reliability across multiple client-facing systems
- Drove migration of legacy services to **containerized microservices**, enabling more efficient deployments and improved scalability
- Enhanced user experience by designing and implementing **high-impact client-requested features**
- Optimized **SQL Server queries and scripts**, improving data processing efficiency and reducing execution times
- Implemented and maintained **RabbitMQ messaging systems**, increasing reliability of asynchronous processing
- Containerized applications using **Docker**, reducing environment inconsistencies and streamlining deployments
- Resolved critical **production issues**, minimizing downtime and improving system stability
- Collaborated in **Agile/SCRUM teams**, consistently meeting sprint goals and contributing to team velocity
- Leveraged **AI tools** to accelerate development, improve debugging efficiency, and enhance code quality

Technical Skills

Languages: C#, .NET

Architecture: Microservices, REST APIs

Databases: SQL Server

Tools: Docker, RabbitMQ, GitHub, Jira

Practices: Agile/SCRUM, Production Support, AI-assisted development

Education

Software Development Program

Ogden-Weber Technical College — 2021
